

Rossignol Axial² / Look PX

- ⚠ For midsole position:
- check on your boot, whether the boot center mark is really in the middle (for some boots it isn't)
 - align with scale on toe and heel template to mid sole mark on ski (or measure 1/2 sole length from toe/heel edge to mid sole mark)
 - when the template is fixed to the ski, check with your bindings and boots inserted, whether positioning is correct (also for screw positions)
