

Marker Kingpin

Front Unit

distance aid for placing
between old holes
print on transparent for optimal use
(turn off using layer function)

⚠ toe line is
not necessarily
15mm distant
to pin line
- in case of
doubts, orient
template on
pin line

⚠ assemble here with other half of template
at the mark of your respective boot sole length

⚠ 1/2 sole length to mounting point

⚠ For midsole position:

- check on your boot, whether the boot center mark is really in the middle (for some boots it isn't)
- align with scale on toe and heel template to mid sole mark on ski (or measure 1/2 sole length from toe/heel edge to mid sole mark)
- when the template is fixed to the ski, check with your bindings and boots inserted, whether positioning is correct (also for screw positions)

⚠ assemble here with other half of template
at the mark of your respective boot sole length

⚠ turn off
information
by using the
PDF layer
function
